## HOME GOLF SIMULATOR VIRTUAL GOLF SIMULATORS FROM \$399

Spectrum Golf specializes in golf simulators for residential and commercial applications. We carry Optishot, Protee, Trugolf with E6 software and P3Proswing. Complete turnkey packages start at under \$2,500. All of our systems carry a one-year warranty. You can use real balls and your own clubs! All of our systems come with a virtual driving range, putting/chipping area and up to 95 courses. Imagine playing all the top courses on a 180-inch screen with stunning graphics in the comfort of your own home. All come with complete swing analysis to work on your game. Just plug in your cable box and/or Blu-ray player, and it doubles as home theater. We can even custom any of our systems to fit your exact space requirements.

## INTRODUCING THE MANTIS "B"

We all agree that to make more putts, it's critical to keep your eye on the ball. Yet the elaborate shapes, reflective metal or white finishes of most putters encourage the opposite. Mantis putters make the ball the hero—simple as that.

Our patented color and finish have proven that when putting with the Mantis, your eyes stay on the ball, not the club. The Mantis "B" is a superbly constructed and balanced heel/toe-weighted putter. It joins our original face-balanced mallet. Both feature a stainless-steel head and milled polyurethane face to deliver great feel with every stroke. Mantis putters conform with USGA Rules.

## JUMBOMAX GOLF GRIPS

JumboMax Grips are a new, USGA-conforming grip designed to fit your hands better for superior surface contact and more solid ball striking. The larger diameter of the JumboMax Grips creates maximum surface contact for a secure and comfortable feel. This, in turn, lets you relax your grip on the club for a more fluid and powerful swing, resulting in longer, straighter golf shots.

\$10.99 per grip

## ORANGE WHIP PUTTING WAND

The Putting Wand takes the flexible shaft from the Orange Whip and connects it to a unique putter head that's ambidextrous and has a round hitting surface. Together, these qualities enhance the learning process to create consistent putting strokes. The Putting Wand improves the rhythm and tempo of putting stroke to enhance distance control and consistency. The unique design of putter head encourages "center contact" because miss hits are exaggerated.
